FIRST GAME WON EASILY

Erskine Gets The Small End Of An
18 to 5 Score

The ball game pulled off on the local diamond on Victoria Day was punk, to say the least. It was the first game of the season, so probably there was some excuse, but if no better ball is played in the "Beaver Amateur Baseball League" in which league Erskine holds a berth, we feel mighty sorry for the supporters. We run out of paper trying to score the errors, but as far as we can remember the visitors were several centuries ahead of the locals, and you can bet your bottom dollar they didn't play an errorless game. The home-sters letted the visiting twirlers' offerings for one, two and three baggers, and with the sprinkling of various kinds of errors, Mirror managed to tally up eighteen runs to Erskine's five. The visitors' battery, Gaines and Blacksome took turns in dish- ing up the ingredients, but everything was pie to the Mirror batsmen and they hit at will. The score is a fair indication of the play. Joe Hueman was on the slate for Mirror and pitched a great game, his curves being an enigma to the Erskinites. He struck out twelve men; in the

third and ninth innings they went out in one, two, three order, and particularly the last when only ten balls were thrown.

The position of umpire was filled by one Allison, of Erskine, and his decisions—well, along towards the latter part of the game they were better, as he had witnessed a little baseball by that time.

The combatants:
Mirror—18
Hueman p. Erskine 5
Smith c. Gaines

Gairns r.f. Schrieber
Campbell—Allison

Score by innings:
Mirror: 3 1 1 5 1 4 0 3 x—18
Erskine: 0 2 0 0 0 1 1 1 0—5

WHY NOT MIRROR?

From the Delburne Progress:
"The Trochu baseball club has challenged the Afix club to a series of games for possession of the Brewery Cup, which is now held in Afix. Some of the sports in Afix are considering the advisability of handing over the cup to Trochu without going to the expense of putting a team in the field to defend it. The idea is a good one, as it generally takes money to get possession of such a mug and then a good bunch of long greens to hold it."

JUDGMENT OF JUDGE TAYLOR

Marvin & Haes, Architects. Vs.
Mirror School Board

(CONT.)

In this case it is purely a question of fact that has to be decided and I do not think I should come to any other conclusion than what is in my mind now if I were to think it over for any length of time.

There is no doubt that the plaintiffs are not entitled to succeed on the extra two per cent charged here for inspection work. The duty of an architect is one thing and that of an inspector is another, and very often an architect takes on the duty of superintendence of construction as well as the duty of drawing plans and specifications, and it is not only in this case but in a great many others, they do not make very satisfactory inspectors for this reason, they are usually busy men and this is the small end of their work and requires no work and attention possibly than the drawing of plans and specifications.

There is no doubt in my mind but what the plaintiffs neglected this work. It is utterly impossible, and I challenge the plaintiffs or anybody else to say otherwise for competent supervision to be made on visiting a job once a month. It cannot be done by visiting once a week with some contractors unless you have eyes that will see through a stone or brick wall because the contractor will cover up any mistake he may make if he possibly can. It is utterly impossible for any man to properly supervise any work whatever on giving it one visit a month. The contractor in this case required supervision, and every last supervision is shown by the defective work that came out of his hands.

There is not a part of the work hardly from the basement to the roof but what is of faulty construction. The photographs filed speak for themselves and speak more eloquently than words can along that line. The fact that the plaintiffs ordered certain work to be done is not sufficient. What does a contractor care about the ordering of work to be done if he does not have to carry out the order, and there is not a little of evidence that a single objection made by the plaintiff was remedied. The inspector or superintendent has power over the contractor in that he can

People Feel Differently

About different things, but no person can feel otherwise than perfectly satisfied when they buy goods from us, because we handle the best lines offered by the wholesalers. ¶ Not only that, but the prices are no higher than many merchants charge for inferior lines.

Our Boot and Shoe Department

Massey-Harris Farming Implements

Lister Gasoline Engines :: Melotte Cream Separators

A Leading firm of Contractors (name and address on application) sent an expert to the Toronto Fair, 1913, to buy the best Gasoline Engine on the grounds. After a careful examination and comparison with others he bought a LISTER 7 H. P. ENGINE, because he found

THE LISTER GASOLINE ENGINE

The most reliable and best value. It starts instantly—every time—no batteries to run down. Self-oiling—no oil cups to fill, no oil wasted. Self-regulating at all loads. No attention needed when at work. Fitted with phosphor-bronze bearings throughout. No babbit metal to wear and run out, and cause trouble. In a word, the best engine on the market is 7 h. p. and a 7 h. p. in stock, come and see them.

Also Agent for Massey-Harris Gasoline Engines and Cream Separator.

MIRROR, ALTA., MAY 20, 1914

THE HOMESTEAD MAP

The 12th edition of a publica-
tion which should prove of in-
terest to every person follow-
ing the progress of settlement
throughout the Provinces of
Manitoba, Saskatchewan and
Alberta is now being issued
from the Railway Lands Branch
of the Department of the In-
terior at Ottawa. This recent
publication which is known as a
"Homestead Map" shows in a
graphic way the land situation
up to the beginning of the pre-
sent year, also the standing of
each quarter-section, thereby
showing the three Western Provinces
according to the records of the
department on the 1st of
January 1914. The map has
been issued in three separate
sheets, the Manitoba and Sas-
katchewan having been issued
some time ago and the Al-
berta now being available for
distribution.

Nothing conveys quite so
forcibly to the eye the rapid
manner in which land available
for entry is being taken up, as
this map of many colours, illus-
trating as it does by a com-
paratively simple system of colour-
ing the standing of each quar-
ter-section at the beginning of
the present year.

In addition to the infor-
mation regarding lands which
have been homesteaded or
otherwise disposed of the pub-
lication contains complete in-
formation with respect to
Indian Reserves, Timber Berths,
Grazing Leases, Post Offices,
Railways, etc., throughout the
three Provinces.

This latest edition of the
Homestead map is being dis-
tributed free of charge and a
copy covering any one, or the
three Western Provinces may
be obtained upon application to
F. C. C. Lynch, Superintendent
of Railway Lands, Department
of the Interior, Ottawa.

THE COUNTRY SCHOOL

Every now and again some
courageous editor rises to re-
mark that the country schools
of Canada are a shame. Not
only are they manned by un-
trained girls, teaching, sud-
denly from a city rather than a rural
point of view, but the buildings
are mean and unsanitary. The
latest protest comes from a
medical man in Essex county,
Ontario, who states that twenty-
five per cent of the schools in
two townships had no wells,
and that 25 per cent of the
wells at the other schools are
bad. Pure water, the founda-
tion of health, is not available
in more than half the schools.
Further, twenty-five per cent
had windows which would not
open, fifty per cent had filthy
closets, and seventy-five per
cent, no cloak rooms.

There is no justification for
such conditions in Essex, and
Essex is not any worse than
many other countries in Can-
ada. Part of the fault is due to
the ignorance and the mean-
ness of the trustees, and this
can be eliminated only by sub-
stituting township school
boards for section boards. The
small school section is an ob-
stacle in every sense and
should be abolished.

Part of the fault is due to
the negligence of Legislatures.
Take Ontario for example,
country schools were practical-
ly overlooked during the session
which has just closed. There
was much talk of "abolish the
law" and how to reform people
who do not need reforming;
there were hours and hours
upon matters which have only
secondary importance to either
side; but there was no one to
plaid with the Legislature
for the thousands of children
and teachers who are annually
contracting tuberculosis be-
cause of dirty ill-ventilated
schools. A dirty country school
house will destroy more human
life than the average country
inn.

The preachers and other
moral reformers would be well
advised to turn their attention
to these real problems as they
affect the moral communities
of Ontario, Manitoba, and the
other provinces--Canadian
Courier.

Ottawa, May 21.--The Dom-
inion buffalo herd at Wainwright,
Alberta, is increasing so rapid-
ly that the government has
now no less than 1500 animals.
When the herd was secured
several years ago there were
only half this number, and no
less than 152 were added by
natural increase during the
past year alone. This infor-
mation was given by Hon. Dr.
Roche, minister of the interior,
during the discussion of his es-
timates. However, the at-
tempts of the government to
propagate reindeer have not
been so successful. Fifty were
secured from Labrador a few
years ago through the assist-
ance of Dr. Wilfrid Grenfell.
They were taken to Fort Smith,
in the Peace River country,
but 17 were lost in transit, and
others were lost in a stampede
caused by the annoyance of
flies. The government has
eaten left, Dr. Roche said
they had not multiplied.

COTTON IN YARMOUTH

Canada's Largest Duck Mill Situated
in Far East—A Record of Expansion

"The Canadian Textile Journal" of Montreal has an interesting account of the history and development of the big cotton company which has been situated in the Town of Yarmouth since 1882. Starting out in a small way in that year extensions were made in 1892, 1907 and again last year in 1932 the total output was 5,000 pounds per week of finished product. This has grown to-day to 15,000 pounds per week.

The human element of this enormous plant is worth considerable study. Hundreds of well paid and seemingly contented employees are on the roll. Of course, if any one will take the trouble to talk to them individually, he will find some kickers—some people will "kick" even in Heaven, if they happen to get there—but on the whole they are perfectly satisfied with the mill and their employees. Quite a number of the employees have been there ever since the mill opened thirty years ago, and very many of the younger men and women, too, have spent practically all their working hours in that mill. The mill was founded on a bond issue, and quite a number of those working there are bondholders. In a large measure the mill is their mill, and its prosperity is their property. Probably this is one of the reasons why the management has never been vexed by labor problems, which are the big-bear of many a mill situated less favorably.

Interdependence of manufacturing industries is demonstrated by a glance at the list of purchasers of this company's product. It will be found that two of their largest individual accounts are the big implement companies of Toronto—Macdonald, who uses large quantities of duck in their binders. Naturally those interested in the Yarmouth mill do not regard the agitation for free agricultural implements with any degree of favor as they know it will, inevitably mean concessions in the shape of reductions in duties on materials purchased by the implement firms. As the duck mill is perhaps the backbone of Yarmouth's commercial life, it will be seen that considerable opposition will arise in this prosperous town to any proposal to reduce the duty on implements, which involves interference with the production of the cotton mill. At the present time the big implement companies have a protection of 17½ per cent. on their binders, in which the duck is used, whereas the duty on duck is the same.

Those who are dependent directly or indirectly on the prosperity of big industry like that in Yarmouth for their livelihood realize fully the value of industrial development in their community. No one in Yarmouth or the vicinity would favor reductions to the duties on duck which would cause a falling off in the production of Yarmouth mill, and provide a mill in United States or England with more work. It is hard to see, however, how the Government can refuse to reduce the duty on duck if they materially reduce the duty on agricultural implements.

WESTERN PORK PACKING

Several New Plants Proposed For the
Extension of the Industry

In addition to the pork packing plants which have been established of recent years in Calgary, Edmonton, and within the last year in Moose Jaw and Saskatoon, Kerrobert will soon boast a good packing industry. The Dominion Abattoir Company, of London, Ontario, has just commenced the erection of a pork packing plant there. The firm expects to see about three hundred hogs per week as soon as the plant begins operations. Farmers should give their support as it will mean much to them in future profits.

It is gratifying to see that Eastern manufacturing firms are realizing the possibilities of development in Western Canada, and are not slow to capture the capital in branches of the West. Already twenty-five or more of the oldest and largest firms in their respective lines in Canada have opened up branch factories in the West, covering such lines as paint, oil, cement, flour, glass, metal roofing, starch, cars, castings, pipe, metal beds and bedding, pork packing, etc. This in a few years the West has already seen tangible results from the stable trade policy Canada has followed for the last quarter of a century. As time passes the West will move and more come to do its own manufacturing, particularly if the policy of requiring United States firms to manufacture their product in Canada in order to enjoy a share of our market is adhered to.

MADE GOOD MONEY
IN MIXED FARMINGHow a Better Near Prince Albert
Has Increased His Capital Twelve
Times in Six Year—

"The Canadian Countryman" reprints a letter from the "Scottish Farmer," which was written by an old settler who had been in the West since the fall of 1894 with about \$400 in his possession. "Was fortunate enough," said the farmer in question, "to secure a good quarter section, and after three years' residence my small capital has increased to about \$2,000 in land, buildings, stock, and implements. This is just one among a multitude of other successes.

The country around is virtually a poor man's paradise, as the poor man is able to become comparatively rich, or the rich man richer. If it had not cost \$2,500 when I came, instead of \$400, I could have been worth \$12,500 now.

"What makes this district so desirable for settlers is that it is adapted to mixed farming, which is really the only kind of farming that can be depended upon as a permanent source of revenue. The country's best advertisement is manifested in those who are leaving here for some imaginary El Dorado fields far off that they find are only a mirage when they get there. The advertising part seems when such people return here and have to begin again, bewailing all the time their loss through leaving here and lamenting their wasted years."

"There are some people who very easily become discouraged and fail. The country cannot, of course, afford that sort of person, and success does not await anyone who comes to seek a life of ease and luxury. What Prince Albert and the surrounding district needs is capitalists to establish such industries and develop the vast resources of the country, and men with willing hands and arms to populate the outlying regions awaiting thousands of homesteaders."

The writer of this letter, Mr. W. W. Carter, appreciates the fact that the farmers' best market is the home market. Only by the building up of industrial enterprises in convenient centres in the West will the Western country secure that well-rounded development which is essential to a broad measure of success, and which will enable it to avoid the problem of unemployment which most Western communities have faced this winter.

Two or three factories in a town can absorb in the winter time most of the floating population, which is busy on the farms in the surrounding district in the summer time. Thus to farm and factory work together to mutual advantage.

HOW TO FEED FACTORIES

Mixed Farming Development Near Edmonton Insures Plentiful Food Supplies

In reviewing the annual address of President Cooper, of the Edmonton Board of Trade, the "Monetary Times" calls attention to the fact that Edmonton has a splendid tributary territory so that its factories, warehouses and railroads, are sure of having good business.

Dealing with suggestions that more active efforts should be made to encourage new industries to come to the city, Mr. Cooper said first he would like to see the ninety-five factories and industrial enterprises already there, operating to full capacity and increasing that capacity; a practical suggestion. To double the output of existing factories is preferable to doubling the number of industries. He felt that more such action is being taken by the Central Alberta Development League, designed to promote agricultural development in the tributary territory, should be vigorously continued, and the attention of outside agriculturists drawn in every possible way to the fact that between the Red Deer and the Athabasca rivers lie probably the best mixed farming country on this continent, and that there is today, and as far in the future as one can see, a ready market at high prices for almost unlimited amounts of all classes of farm products other than grain. At present it is estimated that less than five per cent. of the good, tillable land in the territory referred to is in use. To increase the production of this surrounding land is the surest way to increase the output of Edmonton factories. That is a prize which which Toronto and older Ontario will one day have to recognise in regard to Northern Ontario.

A sound agricultural development, which will provide adequate food supplies for a conveniently situated urban population, is the best foundation for the industrial development which Edmonton and other cities will experience in the next few years under existing fiscal conditions.

MIXED FARMING

What a Grain Dealer Says About a
Convenient Home Market

Mr. James Carruthers of Montreal, one of the largest grain dealers in Canada, at the conclusion of his recent trip through the West said that the farmer in the West depended in the future for success in taking up mixed farming. He stated that he had urged this wherever he went and he plainly could see the danger under present conditions if there was a failure in the wheat crop.

Large Packing Firms
Mr. Carruthers said that about Edmonton there were many large packing firms and that farmers were beginning to raise pigs and sheep and cattle and use the coarser grains and in feeding them, and he said that it was paying them well. Mr. Carruthers stated that at present, the farmer was getting some protection.

The railway companies, said Mr. Carruthers, have seen the importance in educating the farmers to take up mixed farming and have spent thousands of dollars on it. They understood that the good name of the country depends on it and that prosperity will follow which will attract more people to the country.

With the steady development of industrial and wholesale centres in Western Canada there is an increasing market for the products of mixed farming. Apart however from this convenient home market, which is steadily increasing in size, many of the products of mixed farming, through modern cold storage facilities, can be shipped advantageously to foreign countries.

"I do not know much about the tariff, but I do know this much: When we buy goods abroad, we get the goods and the money."—
Abraham Lincoln

In reviewing the annual address of President Cooper, of the Edmonton Board of Trade, the "Monetary Times" calls attention to the fact that Edmonton has a splendid tributary territory so that its factories, warehouses and railroads, are sure of having good business.

Dealing with suggestions that more active efforts should be made to encourage new industries to come to the city, Mr. Cooper said first he would like to see the ninety-five factories and industrial enterprises already there, operating to full capacity and increasing that capacity; a practical suggestion. To double the output of existing factories is preferable to doubling the number of industries.

He felt that more such action is being taken by the Central Alberta Development League, designed to promote agricultural development in the tributary territory, should be vigorously continued, and the attention of outside agriculturists drawn in every possible way to the fact that between the Red Deer and the Athabasca rivers lie probably the best mixed farming country on this continent, and that there is today, and as far in the future as one can see, a ready market at high prices for almost unlimited amounts of all classes of farm products other than grain. At present it is estimated that less than five per cent. of the good, tillable land in the territory referred to is in use. To increase the production of this surrounding land is the surest way to increase the output of Edmonton factories. That is a prize which which Toronto and older Ontario will one day have to recognise in regard to Northern Ontario.
